CHEMA FOAM

BUILD YOUR DREAM

CHEMA BEADS

CHEMA Light Beads is EPS Polystyrene beads, to provide lightweight concrete, refractory insulating bricks, beanbags.

Product Data

Physical State	Beads
Color	White

Technical Data

BS-5

Size grade:	Very Larg
Applactions:	Furniture industry(Bean bags)
Bag weight:	4-5
Foam denisty:	4-5
Expantion bead size:	5 - 7 mm

BS-8

Size grade:	Larg
Applactions:	light concrete
Bag weight:	5 : 6
Foam denisty:	6-8
Expantion bead size:	4.0 - 5.0 mm

CHEMA BEADS

CHEMA Light Beads is Expanded Polystyrene (EPS) Beads, to provide light weight concrete, with thermal insulation.

FEATURES

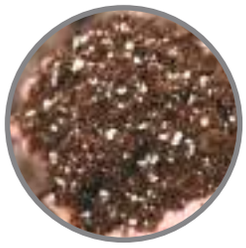
- It is light-weight so easy to handle during transportation and installation.
- It provides thermal insulation.
- Low water absorption.
- Water and aqueous solutions of salts and alkalis do not affect expanded polystyrene.
- compatible with all common construction products.

AREAS TO USE

Lightweight concrete

Light bricks using expanded polystyrene

Furniture industry, "Bean bags for example"



Clayey Soil Mixtures
